

MARKING AND PACKING OF THE AGS PREMIUM QUALITY CYLINDER LINER KITS

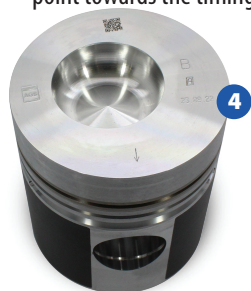

The AGS Premium cylinder liner kits are designed for ZETOR, ZTS, LKT, URSUS, JD 2000 and MTZ tractor types. Their components (1) are manufactured from the highest available quality materials according to the approved drawings. They are continuously expanded and modernized to meet their highest demanding requirements. The basis of the AGS Premium quality trademark is a careful selection of the stable suppliers of individual components manufactured by ISO 9001. All of the suppliers simultaneously supply the parts for OEM production. It guarantees, that the customer receives in AGS Premium quality packaging, the highest quality and checked product. The cylinder liner kits and their components are protected and packed in original AGS Premium quality packaging (2). The box with protective elements is marked by a product label, that includes a barcode and is sealed with the protective seal to guarantee the originality.

On the top lip of the liner there is a selection mark. On the side of the liner (3) there is the producer mark AGS Premium quality. The liner is packed in anti-corrosion foil with AGS Premium quality trademark. Lifetime of the protection is 12 months.

The piston is at the bottom marked with the AGS Premium quality logo, production date, selection mark and an arrow indicating the mounting direction (4). During the mounting into the engine it is necessary to keep the same selection of the liner and the piston. The arrow must point towards the timing gears.

The piston rings (5) are marked by logo AGS Premium quality on the top of the ring next to the lock. The mark must be mounted upwards. The piston ring locks must be twisted against each other.

The gudgeon pins and circlips are hardened and grinded to the exact size. During the mounting it is necessary to heat up the gudgeon pin to 250 deg.C, except of the gudgeon pin for the linder dia. 102mm where is the floating fit.

The AGS Premium quality liner kit includes sealing rings, which are made of the high quality material MVQ blue colour. This material was specially developed for sealing of the cylinder liner kits.

**QUALITY GUARANTEED.
PROFESSIONAL ASSEMBLAGE IS REQUESTED.**
